

# About Our Community

Riverstone Memory Center is a state-of-the-art Senior Living community that specializes in caring for Seniors with memory impairment. Our focus is individualized care that considers and honors where each person is on their path. Our plan is to introduce cutting edge technology that shatters the box of industry standards and the typical worn-out model. Our residents wake each day with a purpose. We all need purpose and love, that is our only goal, to provide a sense of belonging, a sense of community, a sense of self-worth and value.

## We Lead with **H.E.A.R.T.**

**Honor**  
**Empathy**  
**Appreciation**

- Private and Semi-private suites

## Why Memory Care?

Roughly 43% of Seniors are considered socially isolated and over 62% of seniors report feeling lonely: this loneliness is linked to a considerably increased risk of health issues like dementia (up to 50% increased risk), stroke (around 30% increased risk), and even premature mortality (around 26% increased risk). *Our entire community is designed to foster socialization.*

## Why Riverstone Memory Center?

Our staff is specifically trained in memory care behaviors, health, nutrition, and socialization. Our residents have unique needs and often struggle to communicate them. Our experienced staff is well-prepared to identify and respond to these needs appropriately. Our entire community is designed to be accessible for memory care residents.
